

# TRANSFER AND ENTREPRENEUR CENTRE

## AppLab ego.-Incubator

The AppLab is an incubator for the development of mobile apps and web services. It is equipped with various smartphones and tablets of the most important operating systems iOS, Android and Windows as well as Macs and PCs for software development. Furthermore, there is a cloud server with a 64 processor and 1TB main memory for the development of web services available.

For the project work of start-up teams, the AppLab has a modern conference corner with SmartBoard and HD projector. A small library offers reference work for programming and other important technical skills as well as literature on successful founders.

Applications for the usage of AppLab can be found in the secretariat of the Institute for Simulation and Graphics in the Faculty of Computer Science.

See all the MakerLabs available at OVGU: Download our digital Booklet in English

### Requirements

In order to use the ego.-incubators the following conditions have to be met:

- Project presentation with targets and timeframes
- Students or academic staff or peers (artists, physicians, Exist scholarship holders, graduates / graduated employees with founding intentions) at a university in the state of Saxony-Anhalt
- No pursuit of economic activity through the user of the incubator

If you have any questions, please contact the supervisor of the respective ego.-incubator or directly contact the TUGZ
