

TRANSFER AND ENTREPRENEUR CENTRE

Confocal microscope

The confocal microscope allows users to analyze the surface structure of various components.

Training period for independent usage: approx. 8 h

Nanofocus μ surf expert

The Nanofocus μ surf expert is a confocal microscope with which surface structures can be visualized.

Magnification

10x; 20x; 50x

Camera resolution

4 megapixel at 16 bit color depth (HDR-function)

Software

Installed on control computer: μ soft metrology, μ soft analysis

Maximum Z-Height

150 mm
