Slide grinding system

Users of the Additiv+ have access to our slide grinding system

Training period for independent usage: approx. 1h

Rösler slide grinding system R 210/530

The Trugvibrator R 210/530 from Rösler enables the surface finishing of various workpieces and materials.

Trough dimensions

Drum dimension: 210 mm diameter; 530 mm depth; divisible with stainless steel bulkhead

Vibration motor

800 watt asynchronous

Rotation speed

Variable via frequency converter 1500 1/min - 3000 1/min

Equipment

Process water pumping device with sedimentation tank; Timer for semi-automatic processing

Slide grinding body

Currently available: ceramic pentahedron straight and parallel shifted; stainless satellite
