Makercarrel

Makercarrel - The assembly work stations in the FabLab

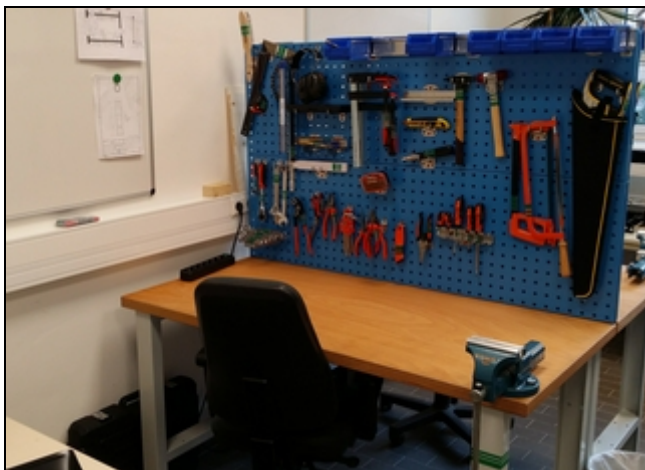

we provide 2 reservable Makercarrels, in addition there is an electronic workbench and mechanical workstations besides the conventional production machines.

Makercarrel (Violet and Green)

Training period for the independent usage, without previous knowledge: theoretically none..

The two Makercarrels are two identical (mirror-inverted) assembly workstations with vice, workboard and the most common hand tools.

Electronical workspace

Training period for the independent usage, without previous knowledge: ca. 2h

Simple circuits and cables can be soldered at our electronic workstations; the users can choose from soldering irons, wires, laboratory power supplies, frequency generator, some Arduino Microcontrollers and the most common electronic components.

If you want to make complex circuits and PCBs, you should definitely register
