International Startup School

The International Startup School is a **workshop bootcamp**, specially tailored to qualify International Students of the OVGU, who are planning to **start their own company** or **work for a startup**.

Throughout two weekends, we aim to accomplish the following:

- **encourage and inspire** International Students to consider starting a company as a way to positively impact the world
- **teach** International Students about **how to start a startup**, and equip them with the **right resources and tools**
- **build a community** of international entrepreneurs who can encourage and teach each other
