International Startup School

The International Startup School is a workshop bootcamp, specially tailored to qualify International Students of the OVGU, who are planning to start their own company or work for a startup.

Throughout two weekends, we aim to accomplish the following:

- **encourage and inspire** International Students to consider starting a company as a way to positively impact the world
- **teach** International Students about how to start a startup, and equip them with the right resources and tools
- **build a community** of international entrepreneurs who can encourage and teach each other
